CERTIFICATIONS

KFG draws people who are passionate about performing quality work that endures. In many fields, our experience is so substantial that we are the primary source of institutional knowledge. Our team members hold certifications in:

- Project Management Professional (PMP)
- Lean Six Sigma Master Black Belt
- Certified Advanced Architect (CAA) in Business Process Management
- Information Technology Infrastructure Library (ITIL)
- Java Programmer Certification
- Javascript Programmer Certification
- Defense Acquisition Workforce Improvement Act (DAWIA)

KFG is a DLA Certified Value-Added Network (VAN) for EDI in the DoD.

"KFG's knowledgeable team of business and technical professionals has enabled DCMA to improve delivery of services to our warfighters."

Director of eBusiness, DCMA

Professional Services & Technical Solutions

Contract Management and Acquisition Support
KFG offers complete Acquisition Support and Contract Management services. With DAWIA-certified staff, our expertise includes cost and pricing analysis, negotiation support, contract closeout assistance, contractor performance assessment, contract payment management and other contract administration related tasks.

Electronic Data Interchange (EDI)
KFG has been a leading provider of software and professional services in the EDI space for more than a decade. KFG's capabilities include complete surveillance of EDI transactions from any originating system to any destination system regardless of data standard. KFG provides high quality data mapping services, VAN services, testing, error detection and system optimization for commercial and government clients.

Program & Project Management
With PMP-certified team members, KFG manages projects with the intention of improving client performance in relation to business process management and systems integration. KFG identifies discrepancies and recommends solutions, provides performance and analysis, and monitors activities impacting time and costs.

Data Management
KFG's expertise in data management, data analytics and data warehousing enables clients to efficiently and effectively cull through and combine data into unified and meaningful information to make key decisions.

Software Development Lifecycle
KFG provides complete lifecycle support in the process of planning, creating, testing, and deploying software. We use agile design for adaptive planning, early delivery, continuous improvement, and rapid and flexible responses to change. KFG also offers cloud-based integration, testing and cloud-architecture solutions.

Business Portfolio Investment Management
KFG provides business portfolio analysis and management to help clients manage their products and services to enhance their strategic planning efforts.

Requirements Management
KFG's experienced team members support clients in documenting, analyzing, tracing, prioritizing and defining requirements for solutions.

Business Process Management (BPM)
KFG offers a complete BPM solution that optimizes workflows, automates processes, and leverages the power of digital forms to improve results and increase compliance. Our solutions integrate with current client ERP, business intelligence, CRM, and other systems.

Business Process Reengineering
To optimize end-to-end processes and automate non-value-added tasks, KFG experts analyze and redesign workflows within and between enterprises.

Policy Definition & Compliance
KFG assists clients in determining, interpreting and writing policy and procedures, as well as advising clients of required changes, to ensure compliancy with specifications and standards.

Performance Management & Measurement
KFG helps clients meet defined business targets. By reviewing performance criteria and metrics, then measuring them against the targets, KFG helps clients determine how they can successfully meet long-term goals.

Enterprise and Business Architecture
KFG's subject matter experts possess experience in technology, business, as well as analysis frameworks required to successfully link all aspects of an enterprise together.

Systems Engineering and Integration
KFG's system integration engineers are highly skilled at integrating complex systems and software applications from various subsystems into a single system, while maximizing performance and interoperability.

Website Design and Development
KFG's experience in a wide range of platforms, web servers, Active Directory, and Public Key Infrastructure applications enables quick delivery of complete website solutions. With high quality auditability, sophisticated web analytics, and upgraded security features, KFG provides seamless, quality outcomes.

Content Management & Collaboration
KFG works with clients to ensure the most effective content management solutions by providing data analysis and data warehousing. Using Oracle, PostgreSQL, MySQL, MS SQL server, KFG streamlines data making it discoverable and presentable, as well as reducing costs and risks throughout the lifecycle.

Curriculum Development and Training Delivery
KFG works with clients to produce and manage standard, interoperable, customized and reusable learning content. Curriculum support is provided to develop innovative, effective learning strategies, and solve technical issues related to installation, upgrade, and maintenance. The content is delivered on various platforms including the web and mobile devices.

Mobile Application Design and Development
KFG offers complete website and mobile app development, upgrade and migration services. We enable clients to create, manage and deliver content that engages audiences and drives amazing user experiences.
